

Limited Warranty Statement

PDC products are manufactured to exacting standards, using high quality certified raw materials and utilizing some of the most advanced manufacturing technologies available. Our facilities and processes are certified to the highest international quality levels which are regularly subjected to external audit.

During the design process we incorporate cycle testing up to 20000 cycles (typically equivalent to 20 years use).

Subject to the assumption that our products are installed by professional and experienced installation partners, in the appropriate manner and as per the intended use * – we certify the products free of defect and capable of a minimum of 10 years plus of trouble-free use.

Should a product be installed and used in accordance with the above criteria, but fail within the 10-year period, PDC will replace the failed part / product. This warranty is limited to the failed product only and does not include installation costs or associated other impacts. The warranty will be adjudicated at PDC's sole discretion.

Please refer to the specification sheet for intended use and other specifications by product.
